Plant Life Cycle Bugaloo
By Eva Thaddeus

I'm a plant and I'm here to say,
I grow a little every day.
With roots and a stem and green leaves too,
Doing the life cycle bugaloo!

I start as a seed, under the ground.
Next, as a seedling I can be found.
With roots and a stem and green leaves too,
Doing the life cycle bugaloo!

When I grow up, I make some buds.
The buds open up, turn into flowers.
With roots and a stem and green leaves too,
Doing the life cycle bugaloo!

Pollen lands on top of me,
I make fruit then, don't you see.
With roots and a stem and green leaves too,
Doing the life cycle bugaloo!

Inside the fruit the seeds are formed.
When they are ripe, they fall to the ground.
With roots and a stem and green leaves too,
Doing the life cycle bugaloo!

Then it comes my time to die.
My seeds will grow, so don't you cry.
With roots and a stem and green leaves too,
Doing the life cycle bugaloo!
